Past work and experiences

The GD Studio, Software Engineer, Stockholm Aug 2023 - present

Maintained and developed The GD Studio's proprietary engine during the development of Diabolical Rogue, focusing on core systems and performance optimization. Worked on a wide variety of systems including particle systems, physically based rendering, collision detection, and entity-component systems. Worked with multi-threaded systems and performed CPU and GPU profiling to identify and resolve performance bottlenecks.

Panthera AB, Spånga, Stockholm Seasonal - Summer 2022

Panthera develops, produces and sell wheelchairs. At Panthera, I was responsible for wheelchair assembly and various production-related tasks to ensure the delivery of high-quality products.

KFUM, Bromma, Stockholm Seasonal - Summer 2021

Camp-leader at Kårsögården, Kårsön, Planning and execution of activities with the theme "adventure and wilderness". Responsible for children's groups ages 8-14.

Education
